

Year 2 Comprehension 17: Rainbow Quest

Once upon a time, in a charming little village, lived a curious girl named Rosie. Rosie loved colours and had a special fondness for rainbows. One day, as she was gazing out of her window, she noticed something magical – a rainbow arching across the sky! Rosie's eyes widened with excitement. She knew that rainbows were more than just beautiful colours; they held secrets and wishes. With her heart full of curiosity, Rosie decided to embark on a rainbow quest.

She grabbed her backpack, which was filled with snacks, a map, and her favourite toy bear. Following the rainbow's vibrant hues, Rosie journeyed through fields, forests, and streams. Along the way, she met talking animals who gave her riddles to solve, and each solved riddle brought her a step closer to the rainbow's end.

Finally, after a day of adventure, Rosie reached the end of the rainbow. To her surprise, she found a sparkling chest filled with colourful gemstones. The rainbow had led her to a treasure of nature's beauty. Rosie decided to share her discovery with the village, and soon, everyone came to see the colourful gemstones. As they marvelled at the vibrant treasures, Rosie realized that the true treasure was the journey itself – the friends she made, the challenges she overcame, and the magic of the rainbow that led her to this wonderful moment.

And so, Rosie's rainbow quest became a cherished story in the village, reminding everyone that the most valuable treasures are often found in the journey, not just at the end.

Multiple Choice Questions
